

MEASUREMENT 1: WHAT THE ORBIT DOES

Public Starlink two-line
element sets

SGP4 propagation
1,200 satellites

Per-pass geometry:
slant range, elevation

Doppler, drift, link-budget
swing, visibility window

MEASUREMENT 2: WHAT IS EVALUATED

Survey tables of
representative works

Population: 46 works
full text for 27

Split each paper:
framing vs. evaluation

Census against a checklist
anchored to 3GPP TR 38.821

What the gap costs: a codec
trained under the modal
assumption, evaluated un-
der the measured conditions

THE TWO BRANCHES SHARE NO INPUT
